## CORE SERVICES

### **Structural Steel Fabrication & Erection**

*Design coordination, fabrication, supply, and erection of structural steel for warehouses, industrial facilities, commercial buildings, and bespoke steel structures. All works are executed in accordance with approved drawings and SABS standards.*

### **Civil Engineering & Road Works**

*Construction and rehabilitation of civil infrastructure including earthworks, grading, compaction, drainage systems, culverts, and pedestrian or vehicular crossing points for urban and rural environments.*

### **Fencing & Perimeter Security Systems**

*Supply and installation of clear view fencing, chain link fencing, diamond wire, access-controlled gates, and high-security perimeter solutions for industrial, institutional, and commercial sites.*

### **Industrial Grating & Handrail Systems**

*Fabrication and installation of mild steel and galvanized grating, platforms, walkways, staircases, and handrails designed to meet industrial safety and access requirements.*

### **Container Offices & Modular Structures**

*Design, supply, and installation of prefabricated container offices, accommodation units, clinics, and site facilities including electrical, insulation, plumbing, and interior finishes.*

### **Building Construction & Fit-Out Works**

*End-to-end residential and commercial construction works including structural construction, interior finishes, aluminium doors and windows, and associated building services.*

## **SELECTED PROJECT EXPERIENCE**

### **Structural Steel Fabrication & Erection**

**Client Type:** Institutional / Industrial

**Scope:** Fabrication, supply, and erection of steel frameworks including columns, beams, and supporting members.

**Outcome:** Delivered within programme and in compliance with approved drawings and SABS standards.

### **Perimeter Security & Fencing Works**

**Client Type:** Commercial / Industrial / Domestic

**Scope:** Supply and installation of clear view fencing, gates, and controlled access systems.

**Outcome:** Improved site security and access control using durable, low-maintenance solutions.

### **Container Offices & Modular Facilities**

**Client Type:** Construction & Infrastructure Projects

**Scope:** Design, supply, and installation of container offices including electrical, insulation, and interior finishes.

**Outcome:** Rapid deployment of functional workspaces meeting site operational requirements.

### **Civil & Road Infrastructure Works**

**Client Type:** Public & Private Sector

**Scope:** Earthworks, road formation, drainage systems, culverts, and access crossings.

**Outcome:** Safe, durable infrastructure improving access and drainage performance.
